Curriculum Overview

Students in the program take core courses in two main areas: decision sciences and information systems. They **learn the latest in the field through courses in big data management, predictive analytics, and optimization with data.**

In addition to teaching students technical and analytical skills, the program also prepares students to effectively lead presentations and communicate their data findings to stakeholders.

Outcomes for Graduates

Graduates of the program are prepared to:

- Collect, organize, and interpret data.
- Use Tableau, SQL, Hadoop, and Excel to identify data patterns.
- Think critically and analytically about business problems.
- Understand essential analytics concepts, methods, and tools.
- Forecast outcomes and develop strategies that drives positive outcomes.

Outcomes for You as An Employer

Companies worldwide are embracing a digital transformation: Today, every business must be supported by relevant, accurate data. Our courses challenge students to harness the power of data to innovate solutions that positively impact business. This skill set—as well as the online degree format—benefits your company by allowing your employee to:

- Continue working full time for you while earning their degree.
- Apply what they learn in class to their role in real time.
- Promote new, innovative solutions to old business problems.
- Feel valued, incentivizing them to stay with your company longer.

We pride ourselves on providing a top-tier graduate school experience—led by industry-leading faculty, staff deeply committed to student success, and a forward-thinking business curriculum.”

Dean Deryck J. van Rensburg

Flexible Online Format

The online MS in Business Analytics program is delivered in an engaging online learning environment that allows students to earn a degree from Pepperdine while managing their professional and personal commitments.

- Live, weekly classes that take place after regular business hours
- 24/7 mobile access to course work that features real business case studies
- One on-campus immersion—most of which occurs over a weekend

Weekend Immersion

During their time in the program, students join us on our Los Angeles, California, campus for one immersion. The immersion engages them in practical training and exercises that enhance their communication skills, promote ethical decision-making, and fine tune their ability to present and pitch their data findings.
